

CLEAN HARBORS LODGING SERVICES

Modular Manufacturing

BCT Structures is a leading manufacturer of custom modular buildings, both temporary and permanent, serving various industries across North America. Working from our state-of-the-art manufacturing plant, we utilize in-house design and engineering to provide options to fit both function and budget. BCT has expertise in building:

- Workforce housing requirements including kitchens, dormitories and drill camps
- Hotels, lodges, apartment complexes and schools
- Offices, first aid and administrative buildings
- Non-combustible construction, blast-resistant structures, and much more

Industry Expertise

BCT employs in-house personnel with a wealth of experience in the modular industry. Our team has experience in providing modular buildings all over the world and in all different types of environments. We strive to work with our clients, from concept to completion, to meet and exceed the needs of the project by providing a custom-focused solution.

Quality Products

We pride ourselves on sourcing high quality components for the manufacturing of our buildings. By incorporating quality control practices and adhering to strict standard operating procedures throughout the build, you can be assured your structure is built with quality and pride resulting in superior products that are made to last.

Cost Effective Solutions & Value Engineering

Our manufacturing plant is located in Lethbridge, Alberta and allows us to provide cost-effective products, while maintaining a skilled, stable and diversified workforce. The specially designed facility, allows us to construct buildings of various sizes and incorporate additional functionality into our offerings.

Turnkey Solutions

BCT Structures, in conjunction with Clean Harbors' vast service offerings, can provide turnkey solutions for any requirement, anywhere. From custom buildings, to transportation, installation, operations and catering, working with Clean Harbors will minimize the number of vendors on your site and enable you to work through one point of contact.

Advantages of BCT Structures Modular Construction

- **Time & Cost Savings:** By utilizing a modular design and assembly line manufacturing, we substantially reduce the time required to design, build and install a finished product. Our facility mitigates risks such as inclement weather, lack of trade personnel and site restrictions, while allowing for site preparation to occur in parallel with modular construction.
- **High-Quality Product:** BCT Structures manufactures in a controlled and closed facility with a substantial quality assurance program and a supervised construction process to ensure a high-quality and innovative product.
- **Industry Leader:** As an award-winning member of the Modular Builders Institute, BCT structures is pushing the industry forward by continually enhancing our product offerings, increasing the use of LEED-certified products and maintaining our COR certification and unparalleled safety statistics.
