

CORONAVIRUS (COVID-19) DECONTAMINATION AND DISPOSAL SERVICES

Fast, professional decontamination and disposal of virus-infected sites and materials.

Recent outbreaks of Coronavirus (COVID-19) have heightened the need for remediation and decontamination of common interior surfaces and the safe disposal of infected materials.

As the largest emergency response provider in North America, Clean Harbors has the strategically-placed resources to provide the fastest, most comprehensive remediation and decontamination services available.

Our turnkey services are delivered by trained experts using company-owned assets, giving your organization the agility to act quickly and effectively to remediate dangerous public health threats. Our training and service methodologies are based on OSHA standards and the highest biosecurity principles and have a proven track record of success.

Our crews routinely perform the following types of services for various government agencies and large corporations on a daily basis:

- **Hazardous and Infectious Waste Management** – Clean Harbors' personnel treat and disinfect hazardous/infectious waste in and around infected sites. The waste is properly packaged, shipped and disposed of. Typical hazardous and infectious waste includes used medical materials and disposables, as well as contaminated household materials and bedding.
- **Waste Disposal Services** – Clean Harbors provides the widest range of treatment and disposal options in the industry for all of your hazardous and non-hazardous waste. We have secure landfills throughout North America, as well as incinerators that can destroy contaminants on the molecular level. All waste is managed, transported and disposed of within the Clean Harbors network, with strict adherence to all local, state, provincial, and federal requirements.
- **Contaminated Site Cleanup** – While performing cleanup operations, Clean Harbors personnel apply corrective action to numerous areas contaminated with viral pathogens. The solid waste is placed in drums and managed as an infectious substance.
- **Emergency and After Hours Response** – The Field Services Division provides emergency response services for various types of incidents to hundreds of companies and agencies throughout North America. This service is typical when dealing with pathogens.
- **Temperature Screening** – Clean Harbors provides personnel to conduct Covid-19 screening for anyone entering your facilities. Staffing needs and hours are custom-tailored to locations and the volume of people in need of screening.
- **Transportation Services** –
 - Mass transit decontamination/disinfection for public usage
 - Private company trucking disinfection
 - School bus disinfection
- **Drive-thru Testing Site Decontamination and Disposal** – Clean Harbors' experienced and highly-trained personnel will provide decontamination services to your drive-thru sites, and will safely clean up site upon closure.

The outbreak of Coronavirus (COVID-19) is a rapidly evolving situation. As a leader in emergency response to hazardous and infectious events, Clean Harbors is committed to the health and safety of our employees and our customers.

CORONAVIRUS (COVID-19) (CONTINUED) DECONTAMINATION AND DISPOSAL SERVICES

Introducing Clean Harbors D3 Clean program.

At Clean Harbors we are continuing our focus on and dedication to helping our customers with their COVID-19 strategies, with Preparedness, Business Continuity and Response as our foundational concepts. As we get closer to the idea of getting back to work as a country, Business Continuity has moved to the forefront. Companies are left wondering what the new world will look like and are seeking programs that will improve the confidence of their employees, their customers, and the public, going forward. Clean Harbors is here to help by providing you with an ongoing program to help get us all working safely again.

DISINFECTION

Recurring disinfection services performed by skilled Clean Harbors professionals with over 40 years of experience in emergency response and infectious-disease management.

DECONTAMINATION

In the event of plausible, possible or known presence of the virus, a complete decontamination service will be performed by Clean Harbors HAZWOPER-trained professionals, using EPA-approved SARS-CoV-2 solutions that eradicate the contamination.

The entire focus is on killing the virus, utilizing everything from foggers to misting equipment, while wearing Level C PPE with total body protection and full-face respirators.

DISPOSAL

Clean Harbors offers complete removal of contamination, with remaining waste safely managed and legally transported to one of our incinerators, where it is destroyed down to the molecular level. Whatever the emergency, you can be sure that Clean Harbors response personnel will execute the clean-up and disposal of your waste in strict accordance with the most current CDC, EPA and DOT regulations.

D3 CLEAN COMMUNICATION PACKAGE

When you join our D3 Clean program you will receive a comprehensive communication plan along with a complete set of program awareness materials that you can share with your employees as well as your customers. Our D3 Clean communication package includes all of the following materials:

Letter to Employees – “We selected Clean Harbors and their D3 Clean Program”

Facility Signage – “We chose the best because your safety matters to us”

Window Decals – “This area was disinfected by Clean Harbors as part of our D3 Clean Program”

CLEAN HARBORS AND INFECTIOUS RESPONSE

- We can provide a quote based on square footage, facility type, or usage, and coordinate dispatch immediately, while on the phone.
- We have a proven track record with outbreaks – both large and small.
- We staved off the highly contagious avian flu outbreak among the poultry population in 2015, during which we decontaminated many large-scale poultry farms right down to the building studs.
- We were called upon to handle the anthrax contagion at NBC studios and the U.S. Post Office in New York following the attacks in 2001.
- We routinely perform decontamination work for a variety of customers in a variety of industries in a variety of settings, and we do it safely. We have the right people, equipment, experience/expertise and capabilities for any coronavirus-related assignment.

Health & Safety is Clean Harbors' #1 Priority

Clean Harbors' number one priority is the health, safety and compliance of our operations, on your sites and ours. Employees at all levels of the company share this philosophy and are committed to ensuring that our safety goals are met.
