

Household Hazardous Waste Management Services

*Your First Choice for
Environmental Management.*

Committed to Your Community.

Proven Leadership in HHW Management

We participate in thousands of household hazardous waste and pesticide collection programs throughout North America. Communities trust us to collect their paints, solvents, batteries, fluorescent lamps, pesticides, cleaners, and other hazardous materials during these one-day, multi-day, and mobile programs because they know we'll do it safely and efficiently, with the highest regard for their environment.

Rely on Clean Harbors for the most comprehensive hazardous and non-hazardous waste disposal services. With more than 170 service locations and over 50 company-owned and operated waste management facilities in the United States and Canada that cover a broad range of disposal technologies, Clean Harbors is your single source for the safe, efficient management of all waste streams.

Since 1980, Clean Harbors has taken the lead in identifying the most cost-effective, environmentally sound options for waste management. Beyond our methodologies to reduce or reuse waste, our wide range of recycling, treatment, incineration, and landfill facilities bring a complete range of alternatives to our customers.

Choose Clean Harbors for the best in flexibility, efficiency, and rapid service.

Maximize Health and Safety, Minimize Liability

Communities and organizations rely on Clean Harbors to handle hazardous materials because they know the job will be done right with strict compliance to all federal, state, provincial, and local environmental, health, and safety regulations.

Our HHW specialists work closely with customers to identify short- and long-term objectives, as well as explore viable options that can lower liability and maximize fiscal resources. We meet the challenges unique to your community or organization.

As an environmentally conscious company, Clean Harbors is committed to recycling and reclaiming wastes using a variety of methods. We identify opportunities for waste reduction and provide options that may have previously been unavailable to you. We also offer a material reuse program that collects new or slightly used, unwanted products and makes them available for reuse by the community. Reuse of these materials, which must meet stringent criteria, not only reduces waste, but also lowers disposal costs.

The scope of our services encompasses the widest range and provides our customers with one single source for satisfying their multiple environmental needs. Our services include hazardous and non-hazardous waste transportation and disposal, laboratory chemical packing, emergency response, field services, and industrial services.

Clean Harbors routinely solves environmental problems throughout the United States, Canada, and Puerto Rico. Our experience, technical and operational resources, and compliance history uniquely qualify us to provide our clients with the resolution to most environmental problems.

Services at a Glance

Consulting

Professional assistance in developing, implementing, and maintaining your unique HHW program

Universal Waste Programs

Design and operate collection programs for federal and state regulated materials

Clean Harbors

Commitment. Leadership. Confidence.

Clean Harbors is North America's leading provider of environmental, energy and industrial services serving over 50,000 customers, including a majority of Fortune 500 companies, thousands of smaller private entities and numerous federal, state, provincial and local governmental agencies.

Within Clean Harbors Environmental Services, the Company offers a broad range of hazardous material management and disposal services, including the collection, packaging, recycling, treatment and disposal of hazardous and non-hazardous waste. We also provide a wide variety of environmental cleanup services on customer sites or other locations on a scheduled or emergency response basis.

Within Clean Harbors Energy and Industrial Services, the Company provides industrial and specialty services, such as high-pressure and chemical cleaning, catalyst handling, decoking, material processing and industrial lodging services to refineries, chemical plants, pulp and paper mills, and other industrial facilities. We also provide exploration and directional boring services to the energy sector serving oil and gas exploration, production, and power generation.

Clean Harbors has more than 175 locations, including over 50 waste management facilities throughout North America in 37 U.S. states, seven Canadian provinces, Mexico and Puerto Rico. The Company also operates international locations in Bulgaria, China, Sweden, Singapore, Thailand and the United Kingdom.

Founded in 1980, Clean Harbors has grown to be the leading and most trusted environmental, energy and industrial services, and waste management company, fully committed to preserving natural resources, serving local communities, and adhering to strict government regulations.

Look to Clean Harbors to handle every aspect of your environmental, energy and industrial services management program.
