

## CLEAN HARBORS LODGING SERVICES

### Modular Office and Administrative Buildings

BCT Structures, a Clean Harbors company, is revolutionizing modular office space towards more functional, economical and comfortable designs.

From standalone office units with on-board water and sewage to multi-unit permanent office complexes, BCT offers a wide range of solutions to meet your office space needs. Our clients can choose from a host of existing floor plans and models in various sizes, or BCT can custom build any design to meet your specific project requirements.

#### Offering a New Level of Customer Satisfaction

BCT provides a high level of customer satisfaction, superior to that of any other manufacturer, by providing:

- State-of-the-art manufacturing facilities
- Large-scale production capabilities
- Experience on mine dry complexes, multi-storey offices and single unit configurations
- A professional, experienced and knowledgeable team that is committed to the highest level of safety and is a member of both Canqual and ISNetworld

#### Turnkey Solutions

BCT Structures, in conjunction with Clean Harbors' vast service offerings, can provide turnkey solutions for any requirement, anywhere. From custom buildings, to transportation, installation, operations and catering, working with Clean Harbors will minimize the number of vendors on your site and enable you to work through one point of contact.

Whether a temporary or permanent mobile office space, first aid building or an administrative building—BCT has the solution to exceed your needs and requirements.

#### Advantages of BCT Structures Modular Construction

- **Time & Cost Savings:** By utilizing a modular design and assembly line manufacturing, we substantially reduce the time required to design, build and install a finished product. Our facility mitigates risks such as inclement weather, lack of trade personnel and site restrictions, while allowing for site preparation to occur in parallel with modular construction.
- **High-Quality Product:** BCT Structures manufactures in a controlled and closed facility with a substantial quality assurance program and a supervised construction process to ensure a high-quality and innovative product.
- **Industry Leader:** As an award-winning member of the Modular Builders Institute, BCT structures is pushing the industry forward by continually enhancing our product offerings, increasing the use of LEED-certified products and maintaining our COR certification and unparalleled safety statistics.
